CUSTOM COMMERCIAL ALUMINUM WORKBOATS

The overall boat configuration is tailored to your application through a variety of options such as length, width, and bottom profile. The hull's floor design allows for ribless interior sidewalls. Minimum .190 marine grade welded aluminum construction. All features provide a durable and dependable workboat hull.

Customized bow decks, deck storage, steering consoles, fuel tank systems 6-50 gal., foam filled false floors, seat storage boxes. We can help "specialize" a boat for your needs.

Kann workboats can be bare bones basic or completely outfitted to meet your needs. From an open utility boat to a cabin boat to help keep the weather out and equipment safe. Kann boats can be designed to a specific or a variety of on the water tasks, all combined with the safety of an all-welded heavy duty aluminum workboat hull.

LARGE LINE HULLS / BARGES

Workbarges designed with full flat top deck, or sidewalls, railings, hatches, cabins, bow doors, davits, winches. "Customized for the big jobs." Units may be powered with single or dual propulsion. All built using the highest quality welding and materials.

COMMERCIAL DUTY TRAILERS

Heavy-duty welded steel construction with bottom bunks and side guide bunks of polyethylene material. Trailer primed and painted or a galvanized option for high corrosion areas. Axles are maintenance free rubber torsion suspension. Lights, winch, tongue jack, and white spoke wheels for tires are standard. Kann trailers are designed and built with the same high quality, long lasting workmanship that goes into every Kann workboat.
